

Biography - Deepak Edakkattil Gopinath

Deepak E. Gopinath is a first-year doctoral student in the Mechanical Engineering Department at Northwestern University and works with Dr. Brenna Argall in the Assistive and Rehabilitation Robotics Laboratory at the Rehabilitation Institute of Chicago. He completed his B.Tech in Engineering Physics from IIT Bombay in 2003, after which he moved to Boston, USA to pursue a Professional Diploma in Music, at Berklee College of Music majoring in Composition and Jazz Performance. Prior to coming to Northwestern, he pursued a Master's in Music Technology at Georgia Tech under Dr. Gil Weinberg where he worked in the field of Robotic Musicianship. His current interests are in assistive robotic manipulation and developing mathematical formalisms for shared control architectures in assistive robotics.
